

## Conscious Cosmic Citizenship

Being Conscious of Cosmic Citizenship is the now age ideal for harmonization, unification, and reconciliation with the Truths of Existence. Every being is a citizen of The Cosmic first and foremost. The Cosmic is the expansiveness and fullness of All there Is as Existence Itself. It is Infinite and Eternal and constitutes the reality of the Source of Being and Intelligence that is All-pervasive and permeates everyone and everything.

The Cosmic constitutes the very Presence of The Absolute, everything and everyone has their being In It, by virtue of it, and is responsible for knowing it. It is The I AM that we each are, with each and every breath we take, with each beat of our heart, and with It's Intelligence, order, and law imprinted on every fiber of our beings, we are not separate from our Creator. We dwell as points of It's Presence and dwelling consciously as points of It's Presence in and by Light of It's Presence is that which will allow us to be reinstated, reoriented, and reconciled with the truth of ourselves, our purposes, duties, and responsibilities in Being.

The institutions of the society in which we live have taken responsibility for educating us, orienting us towards nationalistic citizenship, which cannot take precedence over our Cosmic Citizenship. Cosmic Citizenship is our first point of reference in Being.

We have been groomed to the tenants of capitalism, nationalism, patriotism, religions, and all manners of social association and group identifications, which lay foundation for the tremendous issues we face as a nation undermined by specie-ism, racism, sexism, classism, bigotry, prejudice, homophobia, and all the other isms and schisms that erroneously justifies the neglect, ill-treatment, hostility, oppression, lack of respect, honor, justice, and humanity that millions have and are continuing to experience at the hands of the government, religious, educational, medical communities, as well as individuals.

Conscious Cosmic Citizenship is pre-requisite for being qualified for continuance in existence. The dysfunction, degradation, and disease of individuals, families, communities, and nations of the world have endangered the rights of the peoples to be continued in existence. As All are held accountable to Law, Order, and the Absolute and Eternal Governance of All Existence, it is wisdom to heed the call to consciousness, commitment, and continuance by applying oneself to the studies of Conscious Cosmic Citizenship. There is literature, tapes, and CD's available which expound these timeless teachings.
